

Customer Journey Map

Date	28 June 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	2 Marks

Customer Journey Map

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Collect weather data • Record rainfall values	• Enter weather values • Run prediction • View prediction result	• Analyze prediction • Plan evacuation
Touchpoint <i>What part of the service do they interact with?</i>	• Weather Department • Historical Dataset • Weather Monitoring System	• Flask Web Application • Random Forest Model • Prediction Engine	• Prediction Dashboard • Emergency Response Unit
Customer Thought <i>What is the customer thinking?</i>	• Is the data sufficient? • Is the data accurate? • Can it predict floods?	• Is the prediction accurate? • How reliable is the model? • What is the flood risk?	• How should we respond? • Should alerts be issued?
Customer Feeling <i>What is the customer feeling?</i>	curious	Confident	Responsible

Process Ownership <i>Who is in the lead on this?</i>	Meteorologica Department	Machine Learning System	Disaster Management Authority
Opportunities <i>How can we improve this stage?</i>	• Improve data quality • Increase dataset size	• Improve prediction accuracy • Optimize model performance • Add real-time prediction	• Send automatic alerts
